

LEARNING MANAGEMENT SYSTEM

DEW CIS SOFTWARE SOLUTIONS
<https://www.dewcis.com>

DESCRIPTION

This is a proposal to help your school transition to a digital system of learning and tutoring with ease and comfort. In current times we have witnessed the strains that conventional mediums of education delivery can be subjected to during difficult times. With this in mind we are offering you a learning management system that is easy and efficient to use, set up and operate.

CONCEPT

Our goals in this project are:

- I. Ensure we have set up the system in a way that will not cause any issues for all end users (Teachers and students).
- II. Do training to the users so that they can understand their roles, capabilities and how to navigate the system.
- III. Offer support to all users to allow comfortable use of the system.

Expenses

This are the damages you will incur:

1. Dedicated server	4,000/month
2. Set up	6,000
3. Training	10,000
4. Support	5,000/month

The total amounts to 124,000 per year and we will need 60,000 as down payment.
